Plan D

Actuary's Report

As of September 30, 2007

December 2007

December 27, 2007

Mr. Robert J. Kleine
Chairman of the Board of Directors
Michigan Education Trust
Department of Treasury
P. O. Box 30198
Lansing, Michigan 48909

Dear Mr. Kleine:

PricewaterhouseCoopers LLP (PwC) in conjunction with Richard M. Kaye & Associates has performed an actuarial valuation of Plan D (MET II) of the Michigan Education Trust (MET or the Trust), at the request of the Trust as of September 30, 2007. The valuation is based on data furnished by MET regarding the contracts in force as of September 30, 2007; unaudited financial data provided by MET; the actuarial basis described herein and the contract provisions in effect for the 1995, 1997, 1998, 1999, 2000, 2002, 2003, 2004, 2005, 2006, and 2007 enrollments.

This report presents the results of the valuation of the assets and liabilities of MET II in compliance with Act Number 316 of the Public Acts of 1986 and contains information required for financial statement purposes.

The valuation was performed based upon generally accepted actuarial principles, and tests were performed as considered necessary to ensure the accuracy of the results. We certify that the amounts presented in the accompanying report have been appropriately determined according to the actuarial assumptions stated herein.

This report is prepared for the internal use of the Michigan Education Trust. Any external use or distribution of this report is not authorized without prior written approval of PwC.

Respectfully submitted,

Michael E. Mielzynski, FCAS, MAAA
Manager, PricewaterhouseCoopers LLP

Richard M. Kaye

Section I Summary	1
Section II Measurement of Actuarial Soundness	5
Section III Assets	6
Section IV Contract Data	8
Section V Assumptions and Methods	14
Section VI Contract Provisions Valued	18

SECTION I – SUMMARY

This report presents the results of the September 30, 2007 actuarial valuation of Plan D of the Michigan Education Trust. The valuation is based on contract data provided by MET and unaudited financial information provided by MET.

This section presents a summary of the valuation results and the funded status of Plan D at September 30, 2007.

A. Actuarial valuation highlights

1. Net market value of assets and present value of future collections *	\$607,243,457
2. Present value of future benefits and expenses	\$619,062,030

Assuming the fund earns 7.5 percent

B. Funded Status

In our opinion, the best estimate of the funded status of MET II is to compare the market value of assets plus the present value of future collections with the present value of future benefits and expenses assuming the fund earns 7.5 percent compounded annually. Accordingly, in our opinion, based upon the assumptions and methods stated in Section V and further described in the following section, as of September 30, 2007, the program shows an unfunded liability of \$11,818,573 (A-1 less A-2). The program is 98.1% funded and is expected to pay benefits through 2025 even if no new contracts were issued. It is important to note that new contracts are being offered in 2008 and are intended to be offered in future years.

*Using market value of Treasury bonds and equity mutual funds.

SECTION I – SUMMARY

(continued)

C. Assumptions

This valuation is based on the assumptions and methods stated in Section V.

It should be kept in mind that the soundness determination of MET is based upon many assumptions. There is considerable uncertainty surrounding the significant factors that affect the solvency of the Trust.

The most important assumptions are the discount rate, the rate of increase in tuition, and the selection against the Trust by purchasers and beneficiaries. The discount rate utilized was based upon analysis prepared by the Michigan Department of Treasury, Bureau of Investments and approved by the Board. The other assumptions were adopted by the MET Board based on an analysis of alternatives presented by PricewaterhouseCoopers LLP.

It is premised that expected benefit payments will be diversified in duration to allow MET to invest at the assumed investment yield. It is also premised that MET will be able to liquidate its investments in order to meet future benefit payments while still earning the investment yields that are assumed within this report. Any deviation in the actual investment yield from the expected investment yield may materially affect the conclusions within this report.

Investment Yield

The investment yield is the long-term earnings rate expected from the assets of the Trust. The investment yield is net of any investment expenses charged to the Trust.

MET's investment policy objectives include: the avoidance of volatility; the preservation of the real value of the fund; and the maximization of the expected yield. The investments consist of an immunizing portfolio of zero coupon Treasury bonds and an equity mutual fund. The equity mutual fund investment objective is to outperform Standard & Poor's 500 Stock Index.

The investment yield assumption is based on the earnings of this portfolio together with estimates of the yields that will be available on reinvestment of income.

Exemption from Federal Income Taxation of the Trust

Section 529 of the Internal Revenue Code, added by the Small Business Job Protection Act of 1996, H.R. 3448, exempts Qualified Tuition Plans from Federal income tax. MET has received a determination letter from the IRS stating that MET meets the Section 529 requirements.

On November 8, 1994, the U.S. Court of Appeals for the Sixth Circuit ruled that MET is not liable for Federal income taxes. The Internal Revenue Service refunded taxes paid for the years ended in 1988 through 1995.

Rate of Increase in Tuition

The amount paid for each beneficiary who uses a full benefits contract to attend a four-year State Institution of Higher Education will be the resident undergraduate tuition plus mandatory fees (in this section, "tuition plus mandatory fees" will hereinafter be referred to as "tuition"). Tuition increases reflect effective management of the colleges as well as general inflation, the rate of increase in state support and real improvements in the quality of educational services. Based on careful analysis, the MET Board adopted a tuition increase assumption allowing for improvement in the quality of education above an expected rate of inflation.

The tuition increase assumption adopted by the MET Board is 7.30% for all future years.

SECTION I – SUMMARY

(continued)

New Contracts in Future Years

New contracts in future years serve: a) to expand the base for spreading fixed expenses; b) to increase the likelihood that the MET average tuition cost will not exceed Weighted Average Tuition (WAT) by a significant amount; and c) to ensure a large enough fund balance to invest profitably.

Selection Against the Trust by Purchasers and Beneficiaries

A basic reason for establishing MET is that the purchase of a contract will increase the commitment of the purchaser to a belief the beneficiary will become qualified to enter college; and that the ownership of a contract will cause the beneficiary to be comfortable with a commitment to academic achievement. (This linkage is sometimes referred to as the "Lang effect," after the philanthropist who guaranteed college tuition for a class of students at his alma mater elementary school.)

Selection against the Trust may cause the amount MET pays to exceed WAT. WAT is measured by weighting the tuition at each college by the number of full-time equated Michigan students at that college. The tuition MET pays will equal the WAT if MET beneficiaries attend the Michigan colleges in the same proportions as all Michigan students. On the other hand, if for example, all MET beneficiaries were to attend the University of Michigan, MET would pay tuition much higher than the WAT. Selection refers to the degree to which the MET beneficiaries choose to attend the higher priced colleges, and so cause MET to pay out more tuition benefits.

The cost of selection against the Trust by beneficiaries who attend the Michigan public colleges is offset somewhat by gains from contracts that are terminated. The payments on contracts that are terminated generally are of lower value than the payments on contracts used to attend the Michigan public colleges.

Other

In addition to the key assumptions discussed above and in Section V, the following important assumptions are subject to uncertainty that can be resolved only through the development of meaningful experience in the operation of MET. (A summary of the assumptions and methods is presented in Section V.)

This report assumes that the contract provisions applicable to these 1995, 1997, 1998, 1999, 2000, 2002, 2003, 2004, 2005, 2006, and 2007 enrollments and the Federal income tax status of the Trust will remain the same and will not be changed through State or Federal legislation or regulation. However, the MET Act and Federal tax laws are subject to change.

The tuition structure and other characteristics of the future higher education system used by MET beneficiaries will be identical to the system of the 1990's.

D. Actuarial Method

The primary purpose of this Actuary's Report is to attest to the actuarial soundness of the Trust. The method used should be sensitive to long-term trends in the rate of increase in tuition and investment income. It should allow year-to-year fluctuations in experience. The method must be adaptable to a growing Trust, and be such that it will be accepted as a reasonable standard.

The method used in this Actuary's report is described in Section V.

SECTION I – SUMMARY

(continued)

E. Historical Summary as of September 30, 2007

<u>Number of Contracts</u>	<u>2007</u>	<u>2006</u>	<u>2005</u>	<u>2004</u>	<u>2003</u>
Lump Sum					
Full benefits	14,378	12,812	11,079	9,280	7,878
Limited benefits	3,730	3,375	2,982	2,597	2,265
Community college	1,387	1,241	1,113	948	842
Monthly Purchase					
Full benefits	5,847	5,270	4,810	4,256	3,867
Limited benefits	1,739	1,500	1,349	1,196	1,067
Community college	<u>1,265</u>	<u>1,103</u>	<u>961</u>	<u>815</u>	<u>697</u>
Total	<u>28,346</u>	<u>25,301</u>	<u>22,294</u>	<u>19,092</u>	<u>16,616</u>
<u>Assets</u>					
Market value	<u>\$607,243,457</u>	<u>\$485,392,625</u>	<u>\$400,796,160</u>	<u>\$331,568,463</u>	<u>\$273,352,967</u>

SECTION II – MEASUREMENT OF ACTUARIAL SOUNDNESS

The following table sets forth the Trust's funded status at September 30, 2007:

1.	Present value of future benefits and expenses, assuming the market value of assets earns 7.5% compounded annually*	\$619,062,030
2.	Net market value of assets and present value of future collections	<u>\$607,243,457</u>
3.	Surplus (Unfunded Liability) as of September 30, 2007 = (2) less (1)	<u>\$(11,818,573)</u>

* This figure, which is based on the actuarial assumptions set forth in Section V, represents the net market value of assets required as of September 30, 2007, to provide the benefits and expenses of the program as they become due.

SECTION III – ASSETS

A. Summary of Assets at September 30, 2007

1. Cash and cash equivalents	\$	6,089,923
2. Investments		
a. Short-term investments	\$	22,000,005
b. Unamortized discount on short-term investments		(1,100,105)
c. Bonds		160,901,904
d. Equity mutual funds		344,152,991
Total investments	\$	<u>525,954,795</u>
3. Receivables		
a. Advances to state general fund	\$	-
b. Interest and dividends receivable		1,728,356
c. Tuition contracts receivable		74,862,350
d. Due from others		263,728
Total receivables	\$	<u>76,854,434</u>
4. Liabilities		
a. Undisbursed charitable tuition	\$	-
b. Compensated absences		-
c. Due to vendors and contract purchasers		-
d. Due to MET program (Plans B & C)		1,655,695
Total liabilities	\$	<u>1,655,695</u>
5. Net assets = (1) + (2) + (3) - (4)	\$	<u><u>607,243,457</u></u>

SECTION III – ASSETS

(continued)

B. Changes in the value of assets during the year ended September 30, 2007

1. Value of assets at beginning of year	\$ 485,392,625
2. Changes during year	
a. Additions	
(1) Investment income	\$ 12,318,666
(2) Miscellaneous income	233,317
(3) Net gain on sale of security	3,312,817
(4) Monthly Tuition Contract Receipts	25,429,672
(5) Other contract receipts	56,760,046
Total additions = (1) + (2) + (3) + (4) + (5)	<u>\$ 98,054,518</u>
b. Deductions	
(1) Administrative and other expenses	\$ 1,655,030
(2) Amounts paid under contracts	
(a) Tuition benefits	12,548,619
(b) Termination benefits	
[1] Paid to colleges	1,987,971
[2] Loan defaults/Death refunds	24,636
[3] Paid to refund designee	1,068,686
Total termination benefits	<u>\$ 3,081,293</u>
Total paid under contracts = (a) + (b)	<u>\$ 15,629,912</u>
Total deductions = (1) + (2)	<u>\$ 17,284,942</u>
c. Unrealized appreciation (depreciation)	<u>\$ 41,081,256</u>
Net increases (decreases) during year = a - b + c	<u>\$ 121,850,832</u>
Net market value of assets at end of year = 1 + 2	<u><u>\$ 607,243,457</u></u>

SECTION IV – CONTRACT DATA

A. Contract Data Summary

	<u>Lump Sum</u>			<u>Monthly Purchase</u>			
	<u>Full Benefits</u>	<u>Limited Benefits</u>	<u>Community College</u>	<u>Full Benefits</u>	<u>Limited Benefits</u>	<u>Community College</u>	<u>Total</u>
Total as of September 30, 2006	12,812	3,375	1,241	5,270	1,500	1,103	25,301

Active Purchasers as of September 30, 2007	<u>3,375</u>	<u>1,057</u>	<u>775</u>	<u>5,207</u>

SECTION V – ASSUMPTIONS AND METHODS*

I. Actuarial Assumptions

A. Discount Rate Applied to Expected Future Cash Flows to Determine Present Value

1. Assumption – Investment yield relating to market value of assets – 7.50%, 0.15% higher than the yield utilized last year. The change in this assumption reduced the deficit by approximately 6.3 million.
2. Basis – The Board adopted this assumption at their October 31, 2007 meeting as the rate to approximate the expected investment yield over the lifetime of the present contracts.

B. Tax Status

1. Assumption – MET is exempt from Federal income tax.
2. Basis – On November 8, 1994, the U.S. Court of Appeals for the Sixth Circuit ruled that MET is not liable for Federal income taxes. The Internal Revenue Service refunded taxes paid for the years ended in 1988 through 1995.
3. Comment – Future Federal income tax law changes may affect the taxation of the Trust.

C. Bias – (e.g., disproportionate use of University of Michigan and Michigan State University)

1. Assumption – MET will pay tuition benefits that equal to 110.0% of MET WAT, same assumption used last year.
2. Basis – Analysis of MET I experience.
3. Comment – Could be higher, but there are mitigating circumstances that may prevent a higher rate:
 - a. High acceptance standards at University of Michigan (e.g., compared to highest priced college in Ohio and Alabama).
 - 8 Limit as to how many may attend University of Michigan and Michigan State University.

* Also, see Section I.C. Assumptions, beginning on page 2.

SECTION V – ASSUMPTIONS AND METHODS

(continued)

D. Contract Terminations

8 Assumption

Distribution of Contract Terminations

Refund Type	Full Benefits	Limited Benefits	Community College Benefits
1	26%	27%	10%
2	45%	19%	11%
3	26%	44%	29%
4	3%	10%	0%
5	0%	0%	50%

Description of Refund Type

Refund Type	Amount of Refund	Termination Code & Code Description
1	Weighted Average Tuition	1 – Attend Mich. Independent college – direct refund to college
2	Average Tuition	2 – Attend out of state college – direct refund to college 4 – Full scholarship
3	Lowest Tuition	3 – Attend Mich. Independent or out of state college – direct refund to refund designee 5 – Will not attend college 10 – Other (military)
4	Lowest Tuition	7 – Purchase full or limited benefit, but attend community college
5	Community College WAT	8 – Purchase community college, but attend 4-yr public college
6	Lowest Tuition	6- Death or disability

2. Basis – Based on analysis of MET I historical terminations.
3. Comment – An assumption is made for the number and timing of terminations to which this distribution is applied. The termination assumptions are significant for the valuation because the amount paid by MET is less for terminations than for use at four-year Michigan public colleges. See Section VI – Contract Provisions Valued.

E. **New Contracts** – Assumed to sell 3,500 new contracts annually.

SECTION V – ASSUMPTIONS AND METHODS

(continued)

F. Expenses

1. Assumption – \$2,080,588 in total for MET I and MET II, inflated at 3.5% per year for inflation. Total expenses are split between MET I and MET II according to the number of active contracts expected in each subsequent year, with appropriate recognition for a portion of the future expenses being applied to contracts not yet sold.
2. Basis – Budgeted expenses for Fiscal Year 2007 – 2008, reduced for a portion of the Advertising and Public Relations expenses, as the majority of these expenses are assumed to apply to future contract sales.

G. Use of Credits

1. Assumption

Year Since Matriculation	Distribution of Credit Utilization per Number of Years Purchased			
	4 yrs purchase	3 yrs purchase	2 yrs purchase	1 yr purchase
1	24%	33%	45%	85%
2	24%	25%	30%	10%
3	20%	18%	15%	5%
4	18%	12%	5%	
5	7%	7%	5%	
6	3%	3%		
7	2%	2%		
8	1%			
9	1%			

2. Comment – Students can be expected to delay use, thus providing a benefit to MET. However, an offsetting factor seems to be developing as a meaningful number of students who attend colleges with block pricing take the minimum number of credits each term to enable them to remain full-time.

SECTION V – ASSUMPTIONS AND METHODS

(continued)

H. Tuition Increase Assumption

1. Assumption – 7.30% for all future years. The same assumption was used last year.
2. Basis for Assumption – The MET Board adopted this assumption at their October 31, 2007 meeting.

I. Loadings to Reflect Experience

We now have enough experience of beneficiaries attending college under a MET contract to analyze whether two features of the program will likely cause greater payments than expected. These two features are a) the ability of a beneficiary to attend a college for which block pricing is in effect resulting in the possibility of having the program pay for more years than purchased and b) the ability of a beneficiary to have more than 120 hours covered (even though, for example, four years of coverage was purchased) due to being in a specific program requiring more than 120 hours for an undergraduate degree (e.g. Engineering). We have determined that an appropriate load on liabilities to reflect these features to be 2.0%.

II. Actuarial Method

The present value of future benefits is determined by projecting the weighted average tuition cost including mandatory fees at the assumed annual rate of increase and then calculating the expected present value of the future distributions from the Trust based on the investment income and discount rate assumptions.

The value of the Trust assets is determined by the Trust. In the September 30, 2007 valuation, the assets consist primarily of U.S. Treasury zeroes and an equity mutual fund.

The present value of future benefits is compared to the value of assets. In this valuation, a balance is established equal to the difference between the value of the assets and the present value of future benefits. This balance is a measure of the actuarial soundness of Plan D.

SECTION VI – CONTRACT PROVISIONS VALUED

A. Issue Years 1995, 1997, 1998, 1999, 2000, 2002, 2003, 2004, 2005, 2006, and 2007

B. Benefit Provisions

1. Full Benefits Plan

- | | |
|-----------------------------------|--|
| a. Michigan Public 4-Year College | Full benefits plan provides for tuition and mandatory fees for number of years specified in the contract, from one to four years. |
| b. Community College | If the beneficiary elects to attend a community college, MET will pay the community college tuition cost or the lowest university tuition cost, depending on options selected by the beneficiary. |
| c. Michigan Independent College | If the beneficiary elects to attend a Michigan independent college, the contract may be terminated, and MET will pay tuition to the independent college based on the weighted average tuition cost. If the payment is not made to the college, the amount will be based on the lowest tuition. |
| d. Out-of-State College | If the beneficiary elects to attend an out-of-state college, the contract may be terminated, and MET will pay to the college four annual installments based on the average tuition cost. If payment is not made to the college, the amount will be based on the lowest tuition. |
| e. Full Scholarship | If the beneficiary receives a full scholarship, the contract may be terminated, and MET will pay four annual installments based on the average tuition cost. |
| f. Death or Disability | If the beneficiary dies or has a disability which renders the beneficiary incapable of attending college, the contract may be terminated, and MET will pay one installment based on the lowest tuition cost. |
| g. No College | If the beneficiary does not attend college, the contract may be terminated, and MET will pay four annual installments based on the lowest tuition cost. |

SECTION VI – CONTRACT PROVISIONS VALUED

(continued)

2. Limited Benefits Plan

- | | |
|-----------------------------------|--|
| a. Michigan Public 4-Year College | Limited benefits plan provides for tuition and mandatory fees for the number of years specified in the contract, from one to four years not to exceed 105 % of the WAT. However, if tuition and mandatory fees exceed 105 percent of the WAT, the beneficiary is provided a reduced number of credit hours. |
| b. Community College | If the beneficiary elects to attend a community college, MET will pay the community college tuition cost or the lowest university tuition cost, depending on options selected by the beneficiary. |
| c. Michigan Independent College | If the beneficiary elects to attend a Michigan independent college, the contract may be terminated, and MET will provide funds to the independent college based on the weighted average tuition at the colleges with tuition less than 105 percent of the weighted average tuition. If payment is not made to the college, the amount will be based on the lowest tuition. |
| d. Out-of-State College | If the beneficiary elects to attend an out-of-state college, the contract may be terminated, and MET will pay four annual installments based on the lowest tuition cost. |
| e. Full Scholarship | If the beneficiary receives a full scholarship, the contract may be terminated, and MET will pay four annual installments based on the lowest tuition cost. |
| f. Death or Disability | If the beneficiary dies or has a disability which renders the beneficiary incapable of attending college, the contract may be terminated, and MET will pay one installment based on the lowest tuition cost. |
| g. No College | If the beneficiary does not attend college, the contract may be terminated, and MET will pay four annual installments based on the lowest tuition cost. |

SECTION VI – CONTRACT PROVISIONS VALUED

3. Community College Plan

- | | |
|---------------------------|---|
| a. Community College | Community college plan provides for tuition and mandatory fees for the number of years specified in the contract, from one to two years. |
| b. Other Michigan College | If the beneficiary elects to attend a Michigan four-year public college or a Michigan independent college, the contract may be terminated, and MET will pay tuition to the college in two annual installments as needed based on the community college weighted average tuition cost in the year prior to the contract termination. |
| c. Out-of-State College | If the beneficiary elects to attend an out-of-state college, the contract may be terminated, and MET will pay to the college two annual installments based on the community college average tuition cost. If payment is not made to the college, the amount will be based on the lowest tuition. |
| d. Full Scholarship | If the beneficiary receives a full scholarship, the contract may be terminated, and MET will pay two annual installments based on the community college average tuition cost. |
| e. Death or Disability | If the beneficiary dies or has a disability which renders the beneficiary incapable of attending college, the contract may be terminated, and MET will pay one installment based on the community college lowest tuition cost. |
| f. No College | If the beneficiary does not attend college, the contract may be terminated, and MET will pay two annual installments based on the community college lowest tuition cost. |

- | | |
|--------------------|--|
| C. Transferability | If the contract is transferred to an older beneficiary, MET may charge additional costs, which include a transfer fee, the cost differential between beneficiary ages/grades and MET's loss of investment income. If the older beneficiary accepts the academic year of the original beneficiary, the additional cost can be waived. |
|--------------------|--|

SECTION VI – CONTRACT PROVISIONS VALUED
